67.000 sqm
LOGISTICS
DISTRIBUTION
CENTRE

Welcome

to Kaapstadweg Port of Amsterdam

The Netherlands are known as the logistics crossing of Europe. Thanks to the ideal location and excellent connections, The Netherlands offers fast access to a hinterland with hundreds of millions of inhabitants.

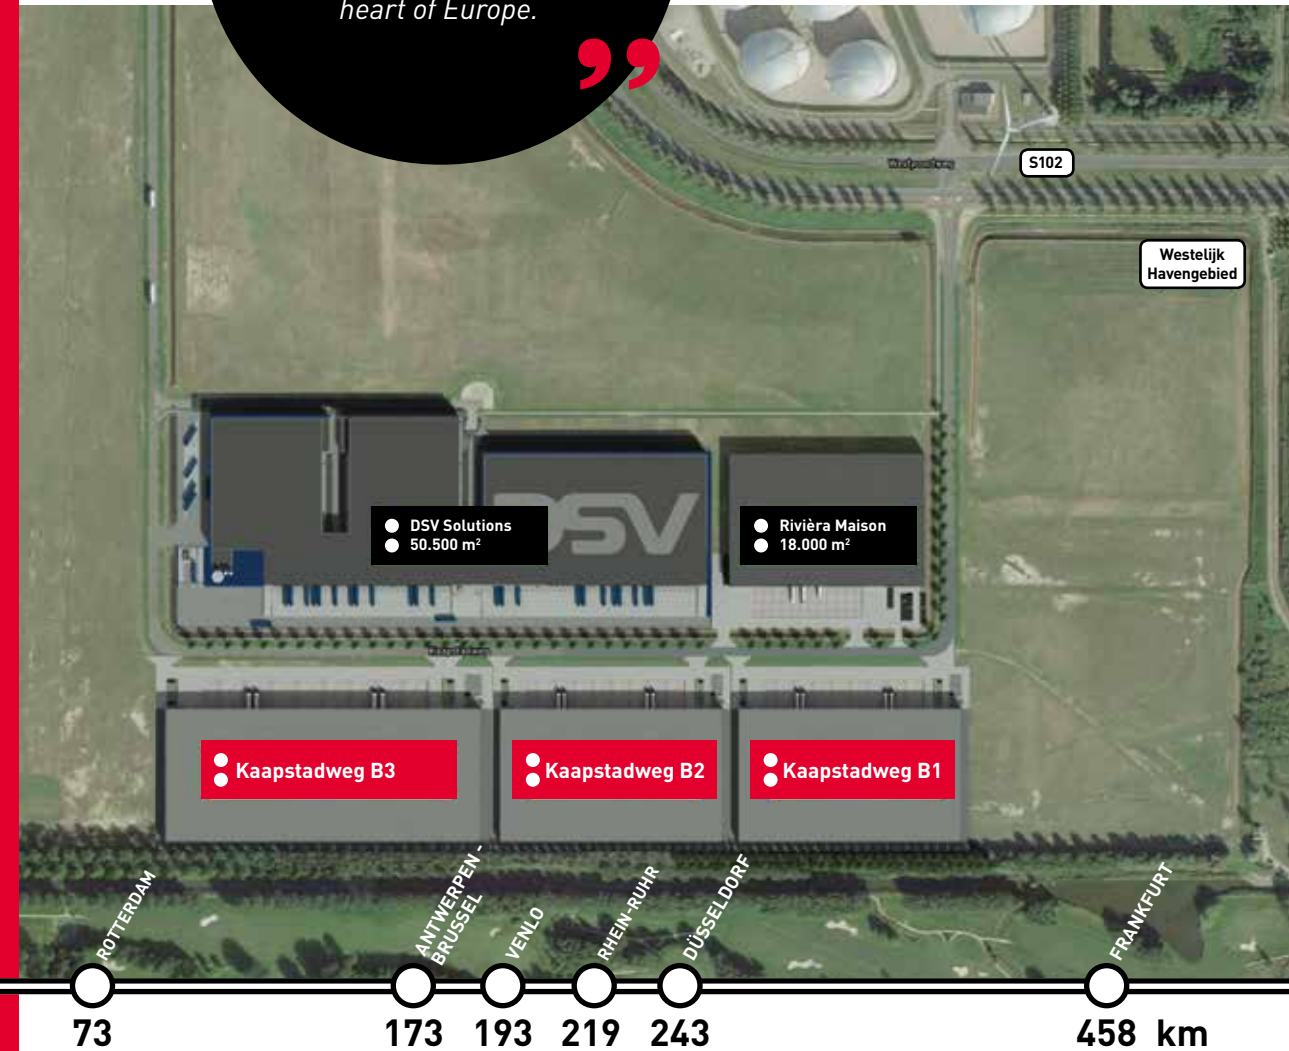

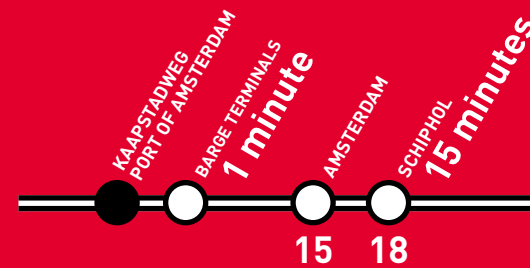

There is a good reason why the European Commission put The Netherlands on top of the list for best transport countries in Europe.

Here, in this logistic heartland, Borghese Logistics have developed a modern logistics strip: Kaapstadweg. In the long run, three properties will arise with a total surface of over 67.000 sqm.

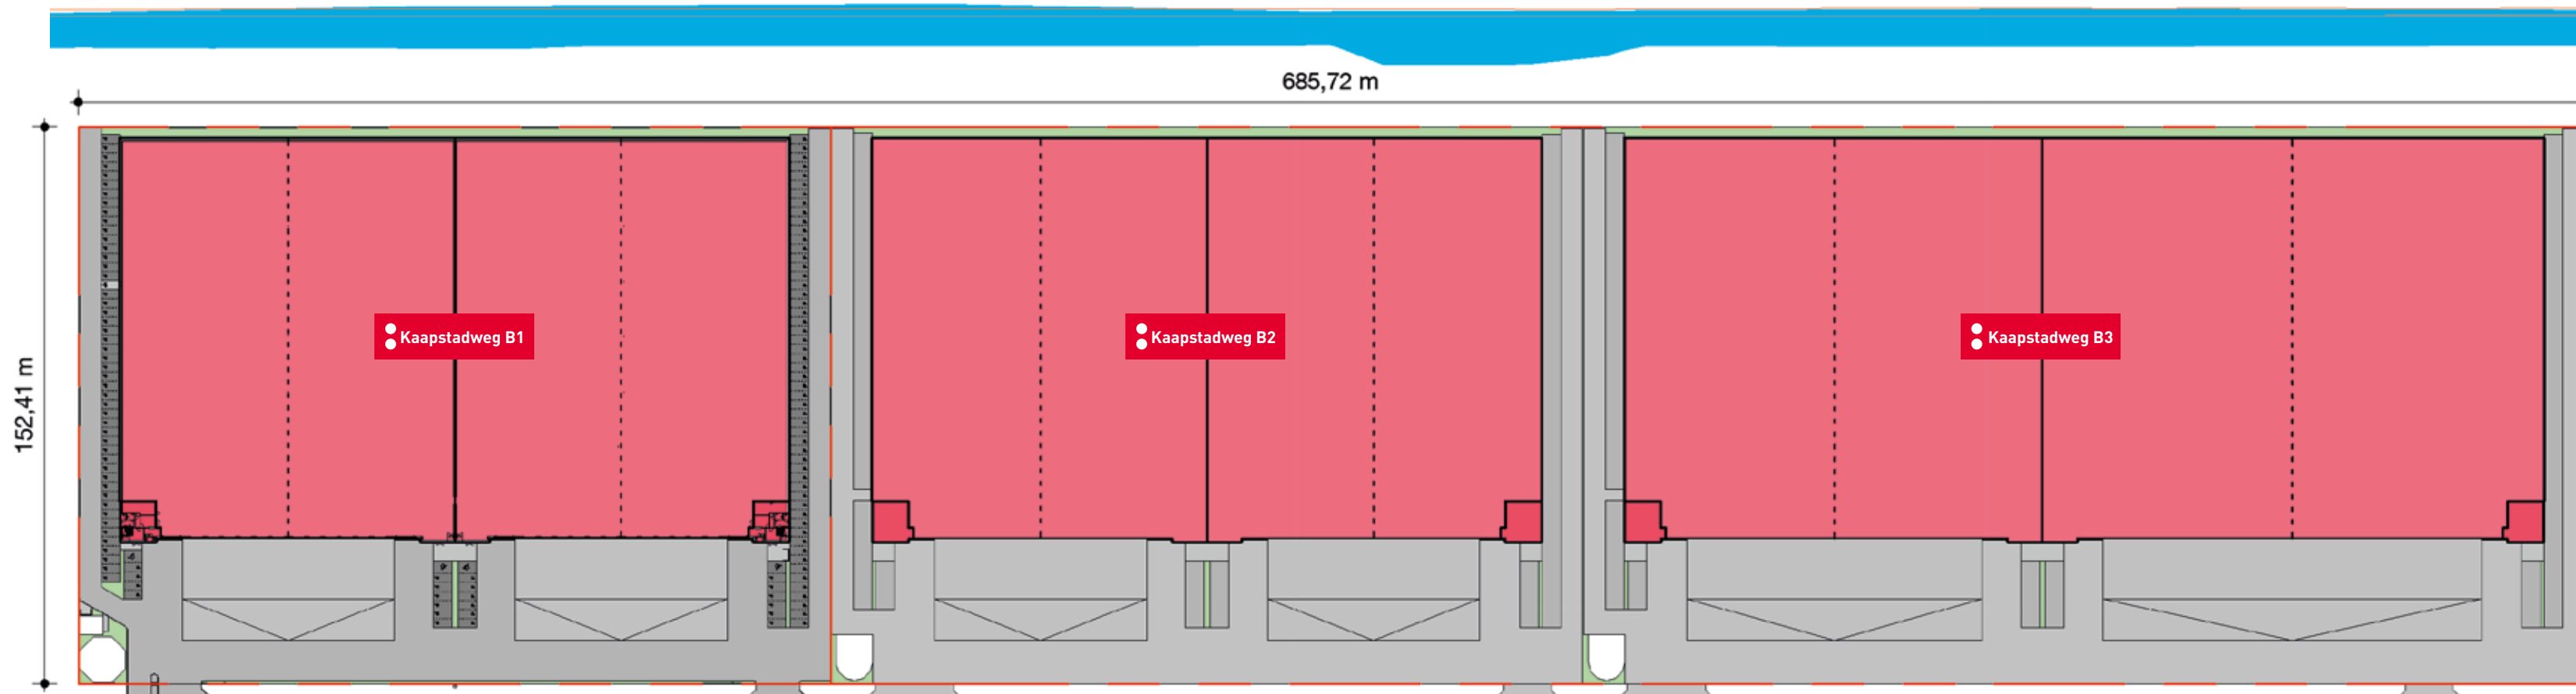

The first phase in this project, with a 20.000 sqm surface is completed in 2017. The second phase, also 20.000 sqm, will be completed 2018. Kaapstadweg is situated at the Atlas Park, a logistics park within the Port of Amsterdam.

Atlas Park is perfectly located, because of the nearby access to the A5 highway, the presence of four barge terminals and the closeness to the Amsterdam Airport Schiphol.

The high quality properties are compliant with the most recent regulations and requirements. Add flexibility, smart architecture and excellent security, and you understand why Kaapstadweg is the ideal logistics location for your business.

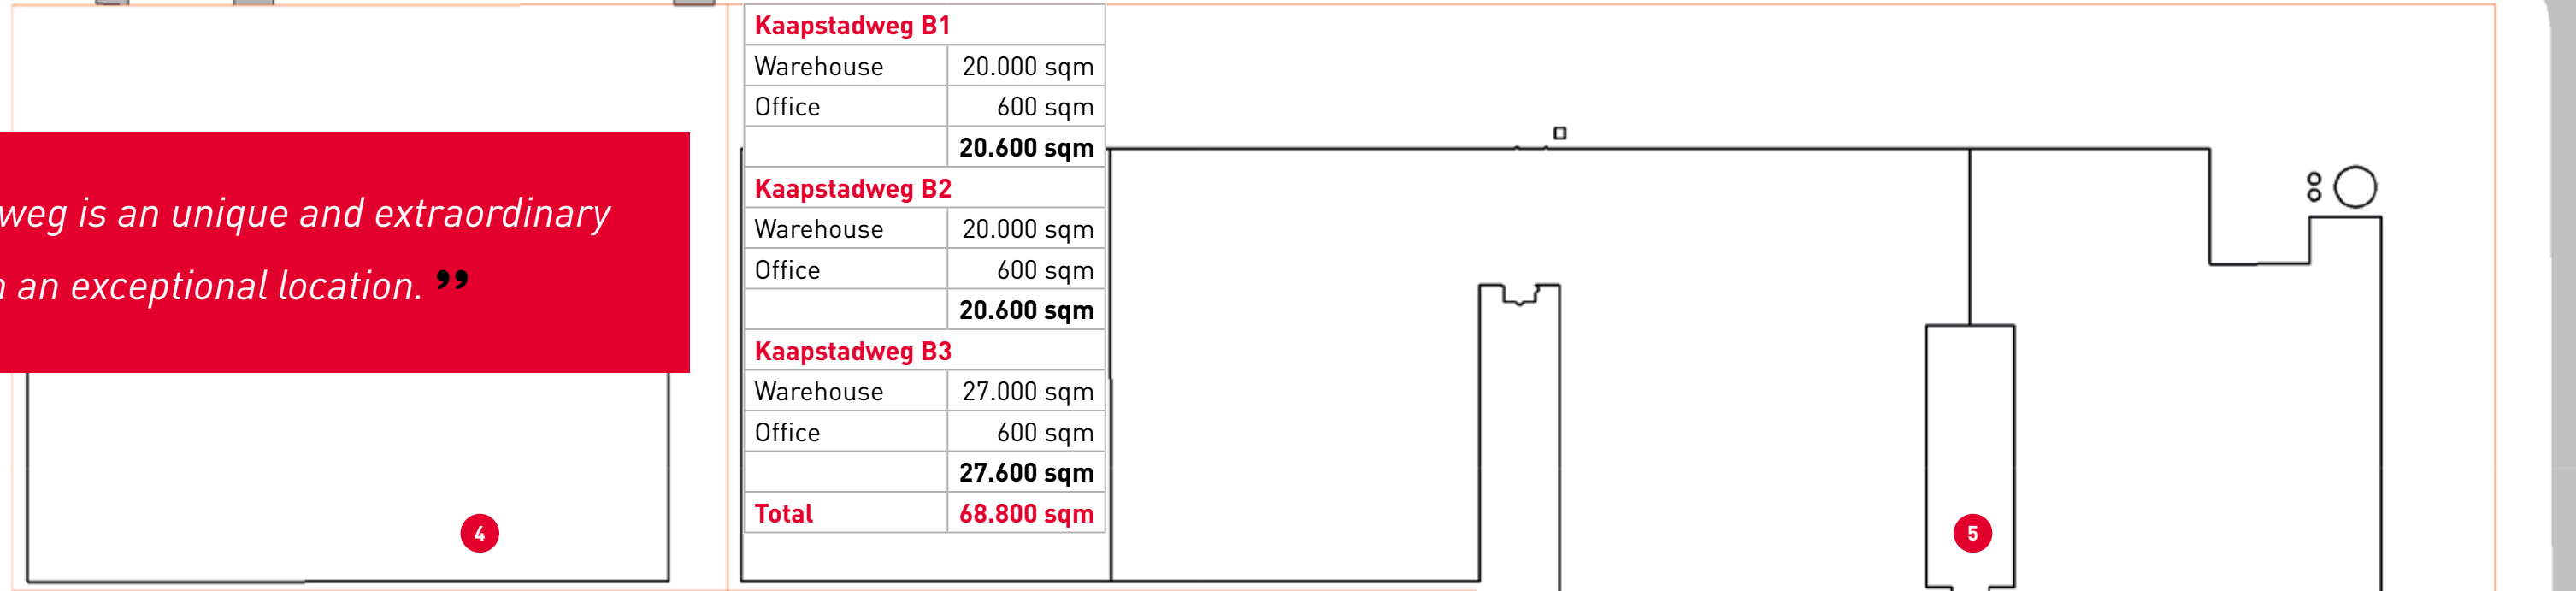

“
With your distribution centre at Kaapstadweg, you are bringing your business into the logistics heart of Europe.
”

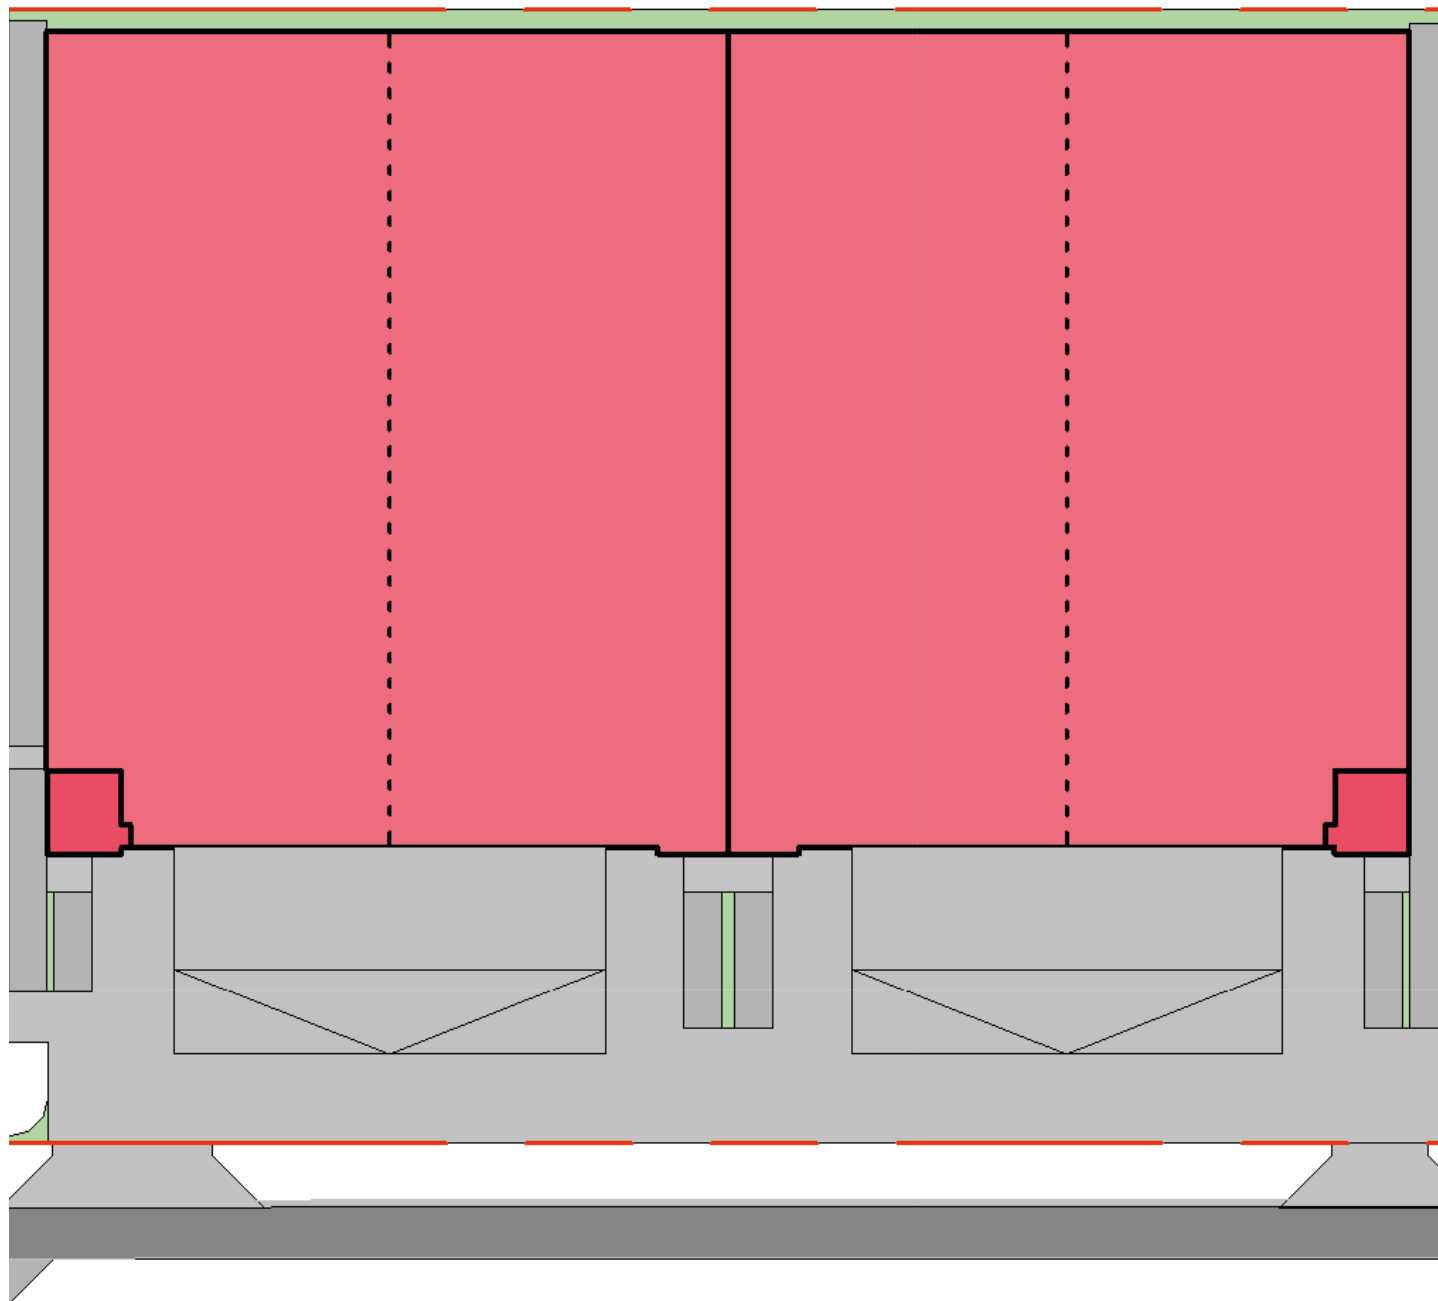

“ Kaapstadweg is an unique and extraordinary project on an exceptional location. ”
